

Do you have yard drains?

Mosquitoes will develop in yard drains underground.

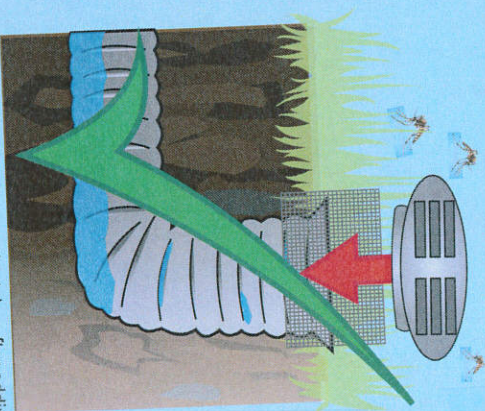

Cover ALL yard drains with window screen to keep mosquitoes OUT!

Un-screened yard drain

Mosquitoes can freely fly IN and OUT of the yard drain cap without the window screen

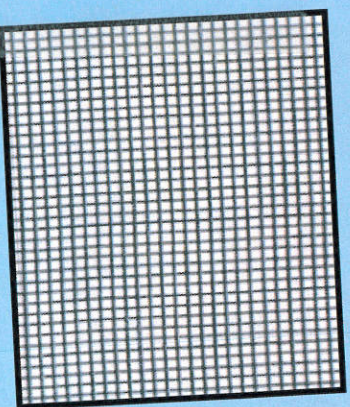

Screened yard drain

Mosquitoes CANNOT enter the tube after adding the window screen under the drain cap

You can find more information & tips on backside

You can purchase window screen at a local hardware store.

Window screen holes MUST BE the size shown above to keep mosquitoes OUT!

Helpful Tips!

- Locate all yard drains & add screens starting in March when mosquito season begins
- Once a month, check screens for holes or tears
- If holes or tears are found, replace screen
- Remove all screens in November, before rain season
